1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Explanation of Results of Operations

In the first nine months of the current fiscal year, the Japanese economy continued to recover slowly as corporate earnings improved along with the yen's weakness. However, the outlook remained unclear because of concerns about an economic downturn in Japan caused by an economic decline in China and other emerging countries in Asia.

The pharmaceutical industry, which is the primary source of demand for Freund Group products, has been growing more slowly, mainly in industrialized countries. Causes include more Japanese government actions to hold down healthcare expenditures such as national health insurance drug price revisions and measures to increase the use of generic drugs, the higher cost of R&D and higher risks associated with the development of new drugs. The focus of attention is shifting to emerging countries and to the expansion of the market for generic drugs.

The Freund Group has developed innovative new products and worked on precisely targeting customers' needs. Group companies also aggressively pursued opportunities in new business fields.

Net sales increased 8.9% year-over-year to 13,081 million yen, operating income increased 24.3% to 727 million yen, ordinary income was up 17.6% to 784 million yen, and net income increased 25.5% to 422 million yen.

Results by business segment were as follows.

Machinery Business Segment

In the machinery sector, where granulating and coating devices are the main products, sales increased as orders remained strong because of the large volume of capital expenditures in the generic drug industry. Operating income decreased mainly because of higher depreciation and R&D expenses at U.S. subsidiary Freund-Vector Corporation, the result of investments aimed at growth, and higher personnel expenses in Japan.

As a result, net sales rose 21.2% year-over-year to 8,663 million yen and operating income dropped 5.5% to 578 million yen.

Chemical and Food Business Segment

In the chemical and food sector, sales of nutritional supplements decreased because of lower production of products for other companies. But sales of pharmaceutical excipients and food preservatives were firm. Operating income increased due to actions to expand high-value added Freund products and to lower the cost of sales.

As a result, net sales dropped 9.1% year-over-year to 4,417 million yen, while operating income rose 25.7% to 404 million yen.

(2) Explanation of Financial Position

Total assets increased 35 million yen from the end of the previous fiscal year to 17,313 million yen at the end of the third quarter under review. This mainly reflected an increase in work in process of 973 million yen, while there were decreases in cash and deposits of 829 million yen and property, plant and equipment of 104 million yen.

Liabilities increased 128 million yen from the end of the previous fiscal year to 6,225 million yen at the end of the third quarter under review. This mainly reflected an increase in advances received of 435 million yen.

Net assets decreased 92 million yen from the end of the previous fiscal year to 11,087 million yen at the end of the third quarter under review.

(3) Explanation of Consolidated Forecast and Other Forward-looking Statements

There are no revisions to the consolidated forecast for the fiscal year ending February 29, 2016, which was disclosed in the Consolidated Financial Results for the Fiscal Year Ended February 28, 2015 dated April 8, 2015.

2. Matters Related to Summary Information (Notes)

(1) Changes in Significant Subsidiaries during the Period

Not applicable.

Changes in subsidiaries other than the specified subsidiaries

In the first quarter of the current fiscal year, Freund International, Ltd. was excluded from the consolidation since this company was absorbed by Freund-Vector Corporation, which became the surviving company, after which Freund International, Ltd. was dissolved.

(2) Application of Special Accounting Methods for Presenting Quarterly Consolidated Financial Statements

The tax expenses are calculated by first estimating the effective tax rate after the application of tax effect accounting with respect to income before income taxes and minority interests during the fiscal year in which the quarter under review falls, and multiplying that rate by the income before income taxes and minority interests for the quarter under review. However, the Company uses the statutory effective tax rate to calculate tax expenses for cases in which using the estimated tax rate gives a noticeably irrational result.

(3) Changes in Accounting Policies and Accounting-based Estimates, and Restatements

The Company has applied the “Accounting Standard for Retirement Benefits” (Accounting Standards Board of Japan (ASBJ) Statement No. 26, May 17, 2012) and the “Guidance on Accounting Standard for Retirement Benefits” (ASBJ Guidance No. 25, March 26, 2015) from the first quarter of the current fiscal year, for provisions set forth in the main clauses of Paragraph 35 of the Accounting Standard for Retirement Benefits and Paragraph 67 of the Guidance on Accounting Standard for Retirement Benefits. Accordingly, the Company reviewed the methods for calculating retirement benefit obligations and service costs, and revised the method of attributing estimated retirement benefit obligations to periods from the straight-line basis to the benefit formula basis, and revised the method of determining the discount rate from the method using a single discount rate calculated based on the average remaining service period of employees to the method using a single weighted average discount rate reflecting the estimated period and amount of benefit payment.

For the application of these accounting standards, etc. in accordance with the transitional accounting treatments set forth in Paragraph 37 of the Accounting Standard for Retirement Benefits, the adjustments associated with the change in calculation methods of retirement benefit obligations and service costs are recorded in retained earnings at the beginning of the first nine months of the current fiscal year.

The result was an increase of 4,112 thousand yen in net defined benefit liability, and a decrease of 2,782 thousand yen in retained earnings at the beginning of the first nine months of the current fiscal year. The effect of this change on operating income, ordinary income and income before income taxes and minority interests in the first nine months of the current fiscal year is insignificant.

3. Important Information about Going Concern Assumption
